

fingers®

A New Language of Technology

AE HALO!

Fingers are the main physical connection between technology and the human mind.
We experience digital technology with fingers.

WE click...
touch...
feel...
carry...
work...
play...
move...

None other than with Fingers.

Fingers communicate so much more.

We make gestures with our fingers, consciously and subconsciously, by

- Showing direction
- Bringing a point of view
- Expressing love
- Signalling on a cricket field with raised fingers - Either disappoints us or bring cheer.

Fingers communicate a lot... It's a language!

At FINGERS, we are here to create 'A New Language of Technology'. Our team takes immense pride in possessing over 450 years of collective experience in the digital space, with a proven track record of creating transformational digital experiences.

Each gadget is crafted with love and the utmost attention to detail by a Dynamic Team that believes in being MAD - Making A Difference - A difference in the way you feel, play and experience Quality Technology. We believe technology should be Trendy and Innovative yet speak in a way that moves and inspires you. And we stand for what we believe - A New Language - breaking the norms and stereotypes.

Huge Portfolio

Feel the Soul of Sound

Close your eyes and think about the
last time music made you forget
where you were!

Real music.
Feel every note. Hear every detail.

That feeling has a name.

Brand By
Dynamic
Conglomerate

*Tested under ideal conditions and in BT playback mode. Playback time may vary depending on usage, playback mode and volume levels.

*Tested under limited conditions. Do not immerse in liquid. (Sweat resistant/Sweat proof/Sealed Membrane)

*Supports PD+QC Power Delivery technology (65W Max). It can even charge Laptops using Type-C to Type-C cable.

Charging time for higher voltage devices may be longer than its original charger due to max. 65 W Power Output.

*Power Delivery is a fast charging technology, supported by certain iOS and Android devices, that delivers much higher levels of power than standard charging.

*Wireless charging support is also compatible with devices having power 5W, 7.5W, 10W output max is 15W.

*Tested under ideal conditions. Battery backup time may vary depending on usage.

*Depending on the devices connected, the power wattage will differ up to 65 Watts.

*USB-C Power Delivery (PD) is a fast charging technology that delivers much higher levels of power than standard charging.

To enable the PD function, we need to use compatible USB-C to USB-C cable and supports devices like smartphones, Tablets, etc. having PD function.

However, it won't support through USB Type-A to USB-C Cable.

*Software may not function smoothly on Linux-based devices.

*Tested under ideal conditions and varies depending on usage, RGB effects and connectivity.

*Can scan different codes - 1D:Codabar, Code 39, Code 32, Interleaved 2 of 5, NEC 2 of 5, Code 93, Straight 2 of 5, Industrial Straight 2 of 5 IATA, Matrix 2 of 5, Code 11, Code 128, ISBT 128,

UPC-A, UPC-ED, UPC-E1, EAN/UJAN-13, EAN/UJAN-8, ISBN, MSI, GS1-DataBar-Omnidirectional, GS1 DataBar Limited, GS1 DataBar Expanded.

2D:PDF417, QR Code, DataMatrix, Aztec Code, China Post, Hongkong 2 of 5, Korea Post, Han Xin code, Maxi Code, Micro PDF417, GS1 composite coders, Codablock A, Codablock F.
